

# CURSO CACTI

**Descripción General**

**Objetivo**

**Duración**

**Requisitos**

## TEMARIO

### Chapter 1: Installation

#### 1.1 Requirements

#### 1.2 Installing Under Unix

##### 1.2.1 Required Packages for RPM-based Operating Systems

##### 1.2.2 Ports for FreeBSD

##### 1.2.3 Configuration of Software Packages

##### 1.2.4 Distribution Specific Installation Instructions

##### 1.2.5 Configure PHP

##### 1.2.6 Configure the Webserver (Apache)

##### 1.2.7 Configure MySQL

##### 1.2.8 Setting Up SNMP

##### 1.2.9 Getting Net-SNMP binaries

##### 1.2.10 Building the Net-SNMP agent from source

##### 1.2.11 Configuring the Net-SNMP agent

##### 1.2.12 Test your configuration

##### 1.2.13 Extending the SNMP Agent

##### 1.2.14 Install and Configure Cacti

##### 1.2.15 Start System Services

##### 1.2.16 (Optional) Install and Configure Spine

##### 1.2.17 Apply Patches

##### 1.2.18 Ubuntu Installation Instructions

#### 1.3 SELinux Settings

##### 1.3.1 Global SELinux Settings

##### 1.3.2 SELinux Settings for Plugins

#### 1.4 Installing Under Windows

##### 1.4.1 Required Software Packages

##### 1.4.2 Configure Security

##### 1.4.3 Install PHP

##### 1.4.4 Configure Permissions

##### 1.4.5 Configure a Web Server

##### 1.4.6 Install Cygwin

##### 1.4.7 Install RRDTOol

##### 1.4.8 Install MySQL

##### 1.4.9 Install Net-SNMP

##### 1.4.10 Install Cacti

##### 1.4.11 Install Spine

- 1.4.12 Apply Patches
- 1.5 Upgrading Cacti
  - 1.5.1 Linux
  - 1.5.2 Windows
- 1.6 Cacti
- 1.0 Plugin Architecture (PIA)
- 1.7 Installing Plugins
- 1.8 Managing Plugins
- Chapter 2: Basics
  - 2.1 Principles of Operation
    - 2.1.1 Data Retrieval
    - 2.1.2 Data Storage
    - 2.1.3 Data Presentation
    - 2.1.4 Graph Overview
  - 2.2 My First Graph
    - 2.2.1 Creating a New Device
    - 2.2.2 Creating the Graphs
  - 2.3 More Graphs
  - 2.4 Using Graphs Tab
    - 2.4.1 The Tree Mode
    - 2.4.2 Creating a Graph Tree

- 2.4.3 The List Mode
- 2.4.4 The Preview Mode
- 2.5 User Management
- Chapter 3: Templates
  - 3.1 Why Templates?
  - 3.2 Data Templates
    - 3.2.1 Walkthrough: My First Data Template
  - 3.3 Graph Templates
    - 3.3.1 Walkthrough: My First Graph Template
  - 3.4 Host Templates
    - 3.4.1 Walkthrough: My First Host Template
  - 3.5 Using Templates
    - 3.5.1 Using a Host Template
    - 3.5.2 Using Graph Templates
  - 3.6 Template Import & Export
    - 3.6.1 Import Templates
    - 3.6.2 Export Templates
- Chapter 4: Advanced Topics
  - 4.0.1 Common Tasks
  - 4.1 Data Input Methods

4.1.1 Creating a Data Input Method

4.1.2 Data Input Fields

4.1.3 Making Your Scripts Work With Cacti

4.1.4 Walkthrough: My First Data Input Method

4.2 PHP Script Server

4.2.1 Using the PHP Script Server

4.2.2 Upgrade Steps for the Example HostMib Data Queries

4.2.3 Migration of Existing PHP Scripts to Script Server

4.2.4 Testing Your Script in the Script Server

4.3 Data Queries

4.3.1 Creating a Data Query

4.4 SNMP Data Queries

4.4.1 Walkthrough: A New SNMP Data Query

4.5 SNMP Data Query Walkthrough

4.5.1 Building Raw XML File

4.5.2 Insert all descriptive table columns

4.5.3 Getting the Output Values

4.5.4 Defining the Data Template

4.5.5 Defining the Graph Template

4.5.6 Revisiting The Data Query

4.5.7 Create Graphs for this Host

4.5.8 VALUE/REGEXP in Action

4.5.9 Script Query XML Syntax

4.6 Script Data Query Walkthrough

4.6.1 Basic Script

4.6.2 XML File

4.6.3 Completing the Script

4.6.4 The Complete XML File

4.6.5 See it at work!

4.6.6 Create the Data Template

4.6.7 Create the Graph Template

4.6.8 Associate Graph Template with Data Query

4.6.9 Creating the Images

4.7 Spine

Chapter 5: Help

5.1 FAQ

5.1.1 Using Cacti

5.1.2 General

5.1.3 Monitoring

5.1.4 Graphs

Tel.: 55 4522 7839/55 1800 7696/7224447684

5.1.5 Windows Related

5.2 Debugging

5.2.1 Check Cacti Log File

5.2.2 Check Basic Data Gathering

5.2.3 Check Cacti's Poller

5.2.4 Check Bulkwalk Behaviour (SNMP Data Queries only)

5.2.5 Check MySQL Update

5.2.6 Check RRD File Update

5.2.7 Check RRD File Ownership

5.2.8 Check RRD File Numbers

5.2.9 Check RRDTool Graph Statement

5.2.10 Miscellaneous

5.2.11 RPM Installation?

5.2.12 Not NaN, but 0 (zero) values?

5.3 Maintenance

5.3.1 Logrotate cacti.log

5.3.2 Daily MySQL Dump of the Cacti SQL Database using logrotate

5.3.3 Migrating RRD Files between Architectures

5.3.4 Migrating RRD Files between Architectures and Hosts

Chapter 6: Reference

6.1 RRDTool Specific Features

6.1.1 GPRINT Presets

6.2 CDEFs

6.2.1 Creating a CDEF

6.2.2 Special Data Source

6.2.3 Using Special Data Source

6.2.4 More CDEF Examples

6.3 Command Line Scripts

6.3.1 Rebuild Poller Cache

6.3.2 Re-Index Hosts

6.3.3 Empty Poller Output Table

6.3.4 Reapply Suggested Names to Graphs

6.3.5 Copy Local Cacti User

6.3.6 Add a New Device

6.3.7 Add a New Graph

6.3.8 Add Items to a Tree

6.3.9 Add Graph Permissions

6.4 Variables

6.4.1 Graph Variables

6.4.2 Host Variables

## Chapter 7: Examples

### 7.1 Managing Graph Y-Axis

### 7.2 Using an Upper Limit

#### 7.2.1 Data exceeds given Limit

#### 7.2.2 Data exceeds given Limit, Capped

### 7.3 Graphing Data with a Small Standard Deviation

#### 7.3.1 Using --alt-autoscale

#### 7.3.2 Using --alt-autoscale and --alt-y-grid

## Chapter 8: RRDTool

### 8.1 RRD Files

### 8.2 About Consolidation

#### 8.2.1 Defining the 1. rrd file

#### 8.2.2 Defining the 2. rrd file

#### 8.2.3 Running the Perl Script

#### 8.2.4 Discussing the results

#### 8.2.5 Using with cacti

#### 8.2.6 See the script working

### 8.3 Using Consolidation

#### 8.3.1 Common view of Traffic Graph

#### 8.3.2 See the MAXimum Data after Consolidation

#### 8.3.3 Viewing Historical Data

#### 8.3.4 Conclusion

### 8.4 Non Integer Values shown

### 8.5 "No Data Loss"

#### 8.5.1 Basic Knowledge for understanding RRAs

#### 8.5.2 Here we go!

#### 8.5.3 Defining a new round robin archive (rra)

#### 8.5.4 Define a new data template

#### 8.5.5 Define a new graph template

#### 8.5.6 Modify Data Query to add Graph Template

#### 8.5.7 Finally: Create Graphs for this Host

#### 8.5.8 Now, where's the trick?

#### 8.5.9 Something to keep in mind

### 8.6 Resize RRD Files

### 8.7 Externally Updated RRDs

#### 8.7.1 Get rrdtool info

#### 8.7.2 Create the Data Template

#### 8.7.3 Create the Graph Template

#### 8.7.4 Prepare the Host

#### 8.7.5 Creating the Data Sources

CURSO 2023

8.7.6 Create the new Graph

8.8 Change y-Axis Scaling

8.9 Data base Design
